A forward-deployed engineer who embeds with enterprises, builds the agents, and feeds patterns back to product. I have done exactly this: replacing critical systems at billions-scale, and building my own multi-agent orchestration platform from scratch.

I build production agents, not prototypes

lupi.live and lupine.science are my materials-science AI stack: MLIP benchmarks, phase-change.

Enterprise deployment is my day job

At Law Business Research I ran white-glove SSO (SAML/OIDC) onboarding for 150+ AmLaw 200 firms.

I prototype in TypeScript and Python and ship

Hands-on architect PM: launched an AI API execution workspace with oRPC, type safety, and live.
