Hiring Team at MongoDB

I am applying for the Senior Data Product Manager, Product Telemetry role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

WHY I AM A STRONG FIT:

- MongoDB is building Atlas Vector Search, semantic search, RAG; acquired Voyage AI for embedding/retrieval models to... — my relevant shipped work: Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- data-driven growth PM work (Arkadium subscription analytics) reframed as owning telemetry/usage data products: Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.
- Ive shipped the work this role calls for — including: Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1m8qgx1

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
