Hiring Team at Goldman Sachs

I am applying for the Asset & Wealth Management, Product Management, Vice President - New York role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.

WHY I AM A STRONG FIT:

- Goldman Sachs is building Firmwide GS AI assistant, generative AI in engineering and AWM workflows, ML across trading/risk... — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- platform PM and AI-tooling experience — frame as modernizing advisor/client workflows with AI, while noting transferable security/identity rigor for a regulated environment: Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- I've shipped the work this role calls for — including: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

A FEW SHIPPED REFERENCE POINTS:

- Public company

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1ogihip

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
