Hiring Team at CoreWeave

I am applying for the Senior Product Manager, GTM role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- CoreWeave is building The 'essential cloud for AI': GPU clusters, AI training/inference infra, data-center and managed... — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- I subscription/package and user-growth wins plus AI fluency to position as a GTM PM who understands both product and adoption: Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.
- I've shipped the work this role calls for — including: Built High Era single-handed: a full go-to-market automation OS on Google Cloud.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1paf8hi

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
