Hiring Team at Workiva

I am applying for the Senior AI Product Manager role (New York, NY).

My pitch for this role is simple: I'm a technical PM who has rebuilt enterprise identity at scale. Built AI-based document scanning and led IAM for a research platform serving 1,000+ clients at Manatt.

WHY I AM A STRONG FIT:

- Workiva is building Workiva AI — generative-AI assistants embedded in reporting/audit/risk workflows on a secure,... — my relevant shipped work: Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- heavy enterprise workflows, exactly Workivas mandate: Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.
- Ive shipped the work this role calls for — including: Unified access models across legacy and new product surfaces, unlocking new revenue.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1r8ay50

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
