Hiring Team at Kensho Technologies

I am applying for the Senior Product Manager role (New York, NY).

My pitch for this role is simple: I'm a hands-on PM who has shipped production multi-agent systems. Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

WHY I AM A STRONG FIT:

- Kensho Technologies is building Agentic workflows, data retrieval APIs, Kensho Link/Classify/Extract/Scribe, S&P AI Benchmarks;... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- AI (extraction/retrieval) and Obsess agentic AI: Led the 3D experience platform at Obsess — avatars, analytics, SOC2 — shipping for global enterprise brands.
- Ive shipped the work this role calls for — including: Worked hands-on with Claude, OpenAI, Gemini, and Copilot as integration partners, not just API consumers.

A FEW SHIPPED REFERENCE POINTS:

- Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.
- Led the 3D experience platform at Obsess — avatars, analytics, SOC2 — shipping for global enterprise brands.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
