COVER LETTER · SYNECHRON · PRODUCT MANAGER - DATA PLATFORM · NEW YORK, NY

Hiring Team at Synechron

I am applying for the Product Manager - Data Platform role (New York, NY).

My pitch for this role is simple: I'm a hands-on PM who has shipped production multi-agent systems. Built NextDocsSearch with OpenAI embeddings served from pgvector in Supabase.

WHY I AM A STRONG FIT:

- Synechron is building FinLabs 'Ready-to-Implement' GenAI solutions; launched an AI Agents suite for financial-services... — my relevant shipped work: Lupine Science — Alex's materials-science AI platform: shipped MLIP benchmarks, phase-change trajectory simulation, and a TypeScript/WebGL browser for real-time molecular visualization. Combines research-grade physics with a shipping product surface.
- data/AI platform PM and financial-services-adjacent rigor; clarify whether the role builds product or delivers for clients: Led the 3D experience platform at Obsess — avatars, analytics, SOC 2 — shipping for global enterprise brands.
- I've shipped the work this role calls for — including: Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1ut5jcl

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
