[COVER LETTER](#) · [CROWDSTRIKE](#) · [PRINCIPAL PRODUCT MANAGER - THREAT DETECTION ENGINE AND CONTENT \(HYBRID\)](#)

Hiring Team at CrowdStrike

I am applying for the Principal Product Manager - Threat Detection Engine and Content (Hybrid) role (New York, NY).

My pitch for this role is simple: I'm a technical PM who has rebuilt enterprise identity at scale. Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.

WHY I AM A STRONG FIT:

- CrowdStrike is building Charlotte AI (agentic SOC), Falcon AI Detection & Response (AIDR) to secure the AI attack surface,... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- driven detection and trust thinking, while acknowledging the detection: Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.
- Ive shipped the work this role calls for — including: Unified access models across legacy and new product surfaces, unlocking new revenue.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1w1tu20

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
