COVER LETTER · JPMORGANCHASE · SENIOR AI PRODUCT MANAGER · NEW YORK, NY

Hiring Team at JPMorganChase

I am applying for the Senior AI Product Manager role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- JPMorganChase is building Firmwide AI/ML at scale: LLM Suite, fraud/risk ML platforms, applied AI across CIB, payments,... — my relevant shipped work: Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- concrete AI/agent products shipped at Obsess and Manatt document-AI, quantifying adoption/impact to show end-to-end AI PM execution: Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- Ive shipped the work this role calls for — including: Built NextDocsSearch with OpenAI embeddings served from pgvector in Supabase.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1xqoe5

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
