COVER LETTER · JOBOT · SENIOR PRODUCT MANAGER - AI SOLUTIONS · NORCROSS, GA

Hiring Team at Jobot

I am applying for the Senior Product Manager - AI Solutions role (Norcross, GA).

My pitch for this role is simple: I'm a hands-on PM who has shipped production multi-agent systems. Shipped RAG-powered semantic search over an editorial corpus, deployed at alexwelcing.com.

WHY I AM A STRONG FIT:

- Jobot is building 'Jax' AI job-matching engine; 'Jeni' AI recruiting assistant — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- AI/agent product shipping; first confirm the actual hiring company before tailoring: Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.
- I've shipped the work this role calls for — including: Lupine Science — Alex's materials-science AI platform: shipped MLIP benchmarks, phase-change trajectory simulation, and a TypeScript/WebGL browser for real-time molecular visualization. Combines research-grade physics with a shipping product surface.

A FEW SHIPPED REFERENCE POINTS:

- Profitable private growth company (employee-owned ESOP, bootstrapped)

Packet (résumé, cover letter, and a 30-second role pitch): [welc.ing/r/pkt-1y269mw](#)

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
