Hiring Team at Rockstar Games

I am applying for the Senior Manager, Product - Creator Platform role (Manhattan, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.

WHY I AM A STRONG FIT:

- Rockstar Games is building No prominent public AI product; AI a contentious internal/labor topic — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- developer/creator-tools PM experience — building tools and ecosystems that empower builders: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Ive shipped the work this role calls for — including: Operated as the only PM in a build that shipped a full marketing-automation OS to production on Google Cloud.

A FEW SHIPPED REFERENCE POINTS:

- Private subsidiary of Take-Two Interactive (NASDAQ: TTWO)

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
