Hiring Team at JPMorganChase

I am applying for the Vice President Product Manager - Digital Products Utilities role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

WHY I AM A STRONG FIT:

- JPMorganChase is building Firmwide AI/ML at scale: LLM Suite, fraud/risk ML platforms, applied AI across CIB, payments,... — my relevant shipped work: Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- platform PM work at Arkadium building reusable capabilities adopted across teams: Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.
- Ive shipped the work this role calls for — including: Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.

A FEW SHIPPED REFERENCE POINTS:

- Public company

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
