Hiring Team at BlackRock

I am applying for the Technical Product Manager, AI - Director role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- BlackRock is building Aladdin Copilot (GenAI); Aladdin AI team; Aladdin Studio developer tooling/APIs — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- Obsess AI delivery; bridge document-AI (Manatt) to Aladdins document/commentary AI use cases: Worked hands-on with Claude, OpenAI, Gemini, and Copilot as integration partners, not just API consumers.
- Ive shipped the work this role calls for — including: Built AI-based document scanning and led IAM for a research platform serving 1,000+ clients at Manatt.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
