Hiring Team at CoreWeave

I am applying for the Staff Product Manager, Data Services role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale.
Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.

WHY I AM A STRONG FIT:

- CoreWeave is building The 'essential cloud for AI': GPU clusters, AI training/inference infra, data-center and managed... — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- data familiarity, acknowledging the infra: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Ive shipped the work this role calls for — including: Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-8otv6r

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
