Hiring Team at FanDuel

I am applying for the Lead Product Manager, Payments role (New York City Metropolitan Area).

My pitch for this role is simple: Alex has lived this problem from the inside: at LBR (Law Business Research) Alex re-platformed the identity & subscription system to handle billions of requests/mo across 10+ products, and ran SSO/SAML/OIDC onboarding for 150+ AmLaw 200 firms. Combined with leading IAM at Manatt for 1,000+ clients, it's a direct fit for FanDuel's trust-and-security surface.

WHY I AM A STRONG FIT:

- Enterprise deployment and trust: Law Business Research: 150+ enterprise SSO integrations and identity systems serving high-trust legal customers at scale.
- Document and knowledge-work AI: Manatt: AI document scanning and knowledge-graph improvements for legal publishing workflows where precision mattered.
- 7+ yrs product management: I bring experience Lead the cover letter with LBR enterprise identity and access at scale (SSO/SAML/OIDC, billions of requests/mo). Position him as a hands-on technical PM comfortable owning ambiguous, technical 0-to-1 work.

A FEW SHIPPED REFERENCE POINTS:

- Enterprise deployment and trust
- Document and knowledge-work AI
- Platform and developer-tooling product work

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
