Hiring Team at Hitachi Vantara

I am applying for the Senior Product Manager, AI Platforms role (United States).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Operated as the only PM in a build that shipped a full marketing-automation OS to production on Google Cloud.

WHY I AM A STRONG FIT:

- Hitachi Vantara is building AI platforms for enterprise data, Hitachi iQ (AI infrastructure with NVIDIA), data fabric and... — my relevant shipped work: Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- AI/agent and platform PM experience (Obsess devtools, Arkadium platform): Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Ive shipped the work this role calls for — including: Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

A FEW SHIPPED REFERENCE POINTS:

- Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-ej45z4

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
