Hiring Team at Capital One

I am applying for the Manager, Product Management - Enterprise AI/ML role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

WHY I AM A STRONG FIT:

- Capital One is building Enterprise AI/ML platforms, agentic AI for customer assistance, developer productivity, and data... — my relevant shipped work: Lupine Science — Alex's materials-science AI platform: shipped MLIP benchmarks, phase-change trajectory simulation, and a TypeScript/WebGL browser for real-time molecular visualization. Combines research-grade physics with a shipping product surface.
- the platform PM who built shared AI/agent infrastructure other teams build on: Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.
- I've shipped the work this role calls for — including: Operated as the only PM in a build that shipped a full marketing-automation OS to production on Google Cloud.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-h3vkx9

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
