Hiring Team at JPMorganChase

I am applying for the Vice President, Product Manager - Payments role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

WHY I AM A STRONG FIT:

- JPMorganChase is building Firmwide AI/ML at scale: LLM Suite, fraud/risk ML platforms, applied AI across CIB, payments,... — my relevant shipped work: Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- via security/identity and API-platform experience (auth, fraud-adjacent trust) as foundational to safe payments products: Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.
- Ive shipped the work this role calls for — including: Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.

A FEW SHIPPED REFERENCE POINTS:

- Public company

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
