Hiring Team at BlackRock

I am applying for the Senior Product Manager - Aladdin Studio Developer, DIR role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

WHY I AM A STRONG FIT:

- BlackRock is building Aladdin Copilot (GenAI); Aladdin AI team; Aladdin Studio developer tooling/APIs — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- Arkadium platform PM + Obsess devtools: I build the tooling and APIs that technical users build on.: Operated as the only PM in a build that shipped a full marketing-automation OS to production on Google Cloud.
- Ive shipped the work this role calls for — including: Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.

A FEW SHIPPED REFERENCE POINTS:

- Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
