Hiring Team at Open Systems Technologies

I am applying for the AI Product Manager role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- Open Systems Technologies is building N/A directly — places AI/product talent at client companies (the actual roles are at unnamed client... — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- end-to-end AI/agent product shipping; ask the recruiter to identify the client and tailor accordingly: Unified access models across legacy and new product surfaces, unlocking new revenue.
- I've shipped the work this role calls for — including: Led the 3D experience platform at Obsess — avatars, analytics, SOC 2 — shipping for global enterprise brands.

A FEW SHIPPED REFERENCE POINTS:

- Private (staffing/recruiting firm; established 1990)

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-pwbxdy

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
