Hiring Team at hackajob

I am applying for the Director, Technical Product Manager role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.

WHY I AM A STRONG FIT:

- hackajob is building 'Archer' AI sourcing agent; in-house AI agents for talent matching — my relevant shipped work: Lupine Science — Alex's materials-science AI platform: shipped MLIP benchmarks, phase-change trajectory simulation, and a TypeScript/WebGL browser for real-time molecular visualization. Combines research-grade physics with a shipping product surface.
- breadth of technical PM delivery (Arkadium platform + Obsess) and add AI as a differentiator: Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.
- I've shipped the work this role calls for — including: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-q9abtd

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
