Hiring Team at Bubble

I am applying for the Senior Product Manager, AI role (New York City Metropolitan Area).

My pitch for this role is simple: I'm a technical PM who has rebuilt enterprise identity at scale. Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.

WHY I AM A STRONG FIT:

- Bubble is building AI Agent dev assistant (builds pages in apps design system); native mobile; GenAI app-generation — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- Obsess AI agents & developer tools PM as near-identical to Bubbles AI app-builder problem space: Unified access models across legacy and new product surfaces, unlocking new revenue.
- Ive shipped the work this role calls for — including: Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-qepzbd

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
