## Hiring Team at Publicis Groupe

I am applying for the Manager, AI Engineering role (New York, NY).

My pitch for this role is simple: I'm a technical PM who has rebuilt enterprise identity at scale. Built AI-based document scanning and led IAM for a research platform serving 1,000+ clients at Manatt.

### WHY I AM A STRONG FIT:

- Publicis Groupe is building 'CoreAI' system unifying first-party data (Epsilon identity graph) with €300M AI investment; Adobe... — my relevant shipped work: Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- If technical-enough, frame identity-graph + AI experience for CoreAI; otherwise this leans eng-management vs Alexs PM track: Unified access models across legacy and new product surfaces, unlocking new revenue.
- Ive shipped the work this role calls for — including: Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.

### A FEW SHIPPED REFERENCE POINTS:

- Public company

Packet (résumé, cover letter, and a 30-second role pitch): [welc.ing/r/pkt-reolio](https://welc.ing/r/pkt-reolio)

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,  
Alex Welcing
