Hiring Team at Google

I am applying for the Group Product Manager, Maps Agentic Capabilities and Experiences role (New York, NY).

My pitch for this role is simple: I'm a hands-on PM who has shipped production multi-agent systems. Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

WHY I AM A STRONG FIT:

- Google is building Gemini models, Vertex AI / Cloud AI agent platforms, Google Labs generative media (Imagen, Veo),... — my relevant shipped work: Lupine Science — Alex's materials-science AI platform: shipped MLIP benchmarks, phase-change trajectory simulation, and a TypeScript/WebGL browser for real-time molecular visualization. Combines research-grade physics with a shipping product surface.
- agent product launches at Obsess and large: Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.
- I've shipped the work this role calls for — including: Integrated MCP servers and agent skills into production research tooling.

A FEW SHIPPED REFERENCE POINTS:

- Public company

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-sffprn

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
