Hiring Team at Gusto

I am applying for the Senior Product Manager, Document Studio role (New York, NY).

My pitch for this role is simple: I'm a technical PM with platform, identity, and document-AI experience: LBR identity/subscription re-platforming, an AI API workspace, and regulated document workflows from Manatt.

WHY I AM A STRONG FIT:

- Compliant document and access systems: Built AI document scanning at Manatt; re-platformed identity/subscription across 10+ LBR products.
- AI platform shipped as product infrastructure: Shipped an oRPC AI API workspace with live introspection and self-improving usage accuracy.
- Workflow adoption across teams: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

A FEW SHIPPED REFERENCE POINTS:

- Identity/subscription platform across 10+ products at LBR
- Type-safe AI API workspace with live introspection
- 1000+ Lupine repo commits in 2026

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-sv08j7

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
