## Hiring Team at Solomon Page

I am applying for the Product Manager role (New York, NY).

My pitch for this role is simple: I'm a single-operator builder who has shipped full products end-to-end. Built High Era single-handed: a full go-to-market automation OS on Google Cloud.

### WHY I AM A STRONG FIT:

- Solomon Page is building N/A (recruiter); clients AI focus unknown from the listing — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- Engage the recruiter to learn the client/domain, then lead with the matching strength (AI, platform, security, or growth): Built the Lupine stack: [lupine.science](#) for research/company framing and [lupi.live](#) for molecular visualization.
- Ive shipped the work this role calls for — including: Built [lupi.live](#) and [lupine.science](#) single-handed: TypeScript/WebGL molecular visualization, MLIP benchmarks, and Python research pipelines.

### A FEW SHIPPED REFERENCE POINTS:

- private (staffing & executive search firm)

Packet (résumé, cover letter, and a 30-second role pitch): [welc.ing/r/pkt-w541ua](http://welc.ing/r/pkt-w541ua)

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,  
Alex Welcing
