Hiring Team at Valon

I am applying for the Senior Product Manager, Product Infrastructure role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

WHY I AM A STRONG FIT:

- Valon is building AI-native servicing platform automating mortgage operations; Rithm Capital expanding its stake to... — my relevant shipped work: Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- infra PM who accelerates the rest of the product org: Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.
- Ive shipped the work this role calls for — including: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
