Hiring Team at LangChain

I am applying for the Product Manager, LangSmith role (New York, NY).

My pitch for this role is simple: I'm a hands-on PM who has shipped production multi-agent systems. Led the 3D experience platform at Obsess — avatars, analytics, SOC2 — shipping for global enterprise brands.

WHY I AM A STRONG FIT:

- LangChain is building LangChain (framework), LangGraph (agent orchestration/memory), LangSmith (observability/eval) —... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- hands-on AI-agent devtools PM work and evidence you understand the agent-builder developers workflow: Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.
- I've shipped the work this role calls for — including: Integrated MCP servers and agent skills into production research tooling.

A FEW SHIPPED REFERENCE POINTS:

- Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.
- Led the 3D experience platform at Obsess — avatars, analytics, SOC2 — shipping for global enterprise brands.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
