ROGO · PRODUCT MANAGER | AGENTS

Hiring Team at Rogo

I am applying for the Product Manager | Agents role (New York, NY).

My pitch for this role is simple: I'm a hands-on PM who has shipped production multi-agent systems. Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.

WHY I AM A STRONG FIT:

- Rogo is building Agentic AI platform for finance (Wall Streets first AI analyst); domain-specific agents over... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- I ship AI agents over document-heavy, accuracy-critical workflows (document AI + agents): Integrated MCP servers and agent skills into production research tooling.
- Ive shipped the work this role calls for — including: Shipped RAG-powered semantic search over an editorial corpus, deployed at alexwelcing.com.

A FEW SHIPPED REFERENCE POINTS:

- Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.
- Led the 3D experience platform at Obsess — avatars, analytics, SOC2 — shipping for global enterprise brands.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1azkod3

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
