TENNR · PRODUCT MANAGER

Hiring Team at Tennr

I am applying for the Product Manager role (New York City).

My pitch for this role is simple: A decade of enterprise platform work: legal-publishing SaaS from beta to millions in ARR, 3D commerce for global brands, and identity infrastructure at billions of requests per month — always owning the path from requirement to production.

WHY I AM A STRONG FIT:

- Enterprise delivery is my default mode: Took a legal-publishing SaaS from beta to millions in ARR at Manatt and shipped 3D-commerce platforms for Alo, Moncler, and Ralph Lauren at Obsess.
- Governance and trust built in: SOC 2, IAM, and data-boundary discipline from running identity for 50%+ of AmLaw 200 firms — regulated-industry requirements are familiar ground.
- Technical depth to hold the whole system: I prototype in TypeScript and Python, shipped an AI API workspace with live introspection, and built my own multi-agent stack — implementation detail never gets lost in translation.

A FEW SHIPPED REFERENCE POINTS:

- Enterprise 3D-commerce deployments for Alo, Moncler, and Ralph Lauren at Obsess
- Legal-publishing SaaS taken from beta to millions in ARR at Manatt
- AI document scanning and knowledge-graph extraction shipped for legal workflows

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-7k1bii

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
